EDUCATION

Indian Institute of Technology (BHU) Varanasi, India
Bachelors of Technology in Mechanical Engineering

Nov 2022 - Jun 2026
GPA: 8.21/10.0

EXPERIENCE

MarkoAI

Full Stack AI Developer, Internship

Mar 2026 - Present
Remote, India

- Built autonomous **AI marketing agents** combining **LLM reasoning**, statistical inference, and multi-agent workflows.
- Developed **FastAPI** integrations for **Meta Graph** and **Google Ads APIs**, ensuring concurrent operations via stateful circuit breakers, jittered exponential backoff, and a **PostgreSQL** distributed lock service with atomic CAS updates.
- Architected a **13-model LLM fallback chain (Gemini/OpenRouter)** featuring automated endpoint cooldowns, and built a Server-Sent Events (SSE) pipeline to deliver real-time, non-blocking agent updates.

PROJECTS

FixFoo - An autonomous GitHub Issue-to-PR Agent

[GitHub](#)

- Engineered an autonomous **GitHub Issue-to-PR** AI agent using FastAPI, **GitHub Actions**, **E2B Cloud**, and **Google Gemini SDK** that analyzes issues, generates code fixes, validates them in isolated sandboxes, and opens verified PR.
- Implemented a production-grade **ReAct** execution pipeline with automatic repository language detection (**Python, Node.js, Go, Rust**), end-to-end test execution, and coverage-delta validation to ensure only verified fixes are proposed.
- Designed a secure autonomous execution pipeline with sandbox isolation, protected filesystem policies, output sanitization, and verification gates to prevent unsafe code changes.

Multi-Modal Document Intelligence

[GitHub](#)

- Engineered a **multi-modal RAG pipeline** utilizing advanced PDF parsing to extract text, tabular data, and images, implementing a multi-vector retrieval strategy to feed rich contextual metadata into the LLM.
- Boosted answer relevance by **20%** and reduced retrieval latency by **15%** by optimizing multi-vector embeddings and fine-tuning vector database search parameters.

Other Projects

- **Voicemail Compliance Engine** [🔗](#): An AI-powered audio decision engine for detecting voicemail events.
- **NLP with Disaster Tweets** [🔗](#): **Transformer**-based tweet classification with feature engineering and model evaluation.
- **Additional ML & GenAI Projects** [🔗](#): End-to-end ML pipelines, retrieval systems, and **API**-based inference services.

ACHIEVEMENTS

Programming Achievements	Achieved Specialist rank on Codeforces with a maximum rating of 1574 . Profile	2025
Programming Achievements	Secured a global ranking of 758 in Codeforces Round 1020. Leaderboard	2025
LeetCode Achievements	Solved 500+ Data Structures and Algorithms problems on LeetCode.	2025
American Express Challenge	Secured National Rank 10 overall among 12,000+ participants.(Decision Science)	2025
Amazon ML Challenge	Secured Top 50 rank by building a multi-modal price prediction system.	2025
Poker Bot Tournament	Secured 1st place with \$38,000+ profit by building a high-performance poker bot.	2025
iRage Prediction Challenge	Ranked among the Top 10 teams in a financial return forecasting competition.	2026
IMC prosperity 3	Ranked Top 86 globally and Top 15 nationally among 13,600+ teams. Leaderboard	2025
Chess Tournament	Secured 1st place in Division 20 of the Spring 2025 Indian College Chess Championship.	2025
PyStatiq Challenge	Ranked 7th among 3k+ participants in the PyStatiq Coding Challenge CAPM.	2025
RedrobAI Hackathon	Ranked Top 20 - Build an autonomous intelligent candidate ranking pipeine.	2022

TECHNICAL SKILLS

Languages: Python, JavaScript, React	Databases: SQL, NoSQL(MongoDB), Supabase
ML & GenAI: Scikit-learn, Pandas, NumPy, PyTorch,	Backend & APIs: FastAPI, Flask, Pydantic, REST APIs,
LangChain, FAISS, HuggingFace, Matplotlib, Seaborn	Vector Databases, RAG, FAISS
Cloud & Deployment: AWS, Docker, Render, Vercel	Tools & Platforms: Git, GitHub, Power BI, Streamlit

POSITIONS OF RESPONSIBILITY

Teaching Assistant, Coding Ninjas:	2024 - 2025
Mentored students in Data Science coursework; resolved doubts in Python, statistics, and ML.	
Core Member, Programming Club:	2022 - 2024
Participated in problem-solving sessions, coding contests, and peer discussions on DSA and algorithms
